# SANITIZER MIST SPRAY GUN

## AccuClean

Complex Problems. Simple Solutions!

### Applications :

- Wide spectrum of applications in high traffic areas
  - Staff, Customers, Delivery Personnel
  - Showrooms, Offices, Hotels, Cafes
  - Hospitals, Clinics, Schools
  - Cargo Containers, Production Machines, Delivery Vehicles
- Fine Mist, No Wastage, Wider Coverage
- Pressure control knob to adjust mist
- Works on vacuum pressure and doesn't use a compressor
- Only 40w power consumption
- Economical in the long run due to controlled usage of sanitizer liquid

### Specifications :

1. 3-Pin Plug, 3 Meters Wire Length, Fuse Protection Embedded.
2. Teflon Quality Internal Wires (Functions up to 300 degree centigrade)
3. Copper Interior Switch (Not Aluminum)
4. F-Class Copper Motor Coil (One of the best grade of copper wire)
5. Diamond Paste Lapping Process Cylinder Polishing (Best possible method to do a cylinder polishing on the inside of the cylinder)
6. Hanging Hook provided
7. Spray Gun Body Made from Fire Resistant Nylon Grade of Material.
8. 750ml Tank Capacity

### Precautions :

1. Use Alcohol-based Solvent (Liquid Only - Do not use Gel).
2. Switch On & Off at Equal Intervals, Maximum up to 15 seconds of continuous use.
3. Do not use the unit without solvent. It will damage the internal parts.
4. Do not use the gun with solvent on electrical/electronic points of contact.
5. Use the spray in a well ventilated area.
6. After usage of the gun for the day, spray out remaining solvent in the gun after emptying the jar. Open the piston and oil it lightly.
